

**«LIPOVITAM BLACK CUMIN
STIMULATES THE ACTIVITY OF ALL
BRANCHES OF THE IMMUNE SYSTEM
AND BOOSTS THE PROTECTION OF
THE BODY AT THE CELLULAR LEVEL:**

- strengthens the immunity and reduces the risk of chronification of inflammations; increases resistance to influenza, coccal infection, and other pathogens.
- stimulates the cardiovascular system; relieves «chronic» fatigue symptoms, recovers strength
- improves metabolism, digestion, increases gut motility, restores PH balance; regulates blood sugar, glucose and cholesterol levels; removes bile, wastes, and toxins.
- restores elasticity of the oral and esophageal mucosa and provides a skin tightening effect.
- supports the reproductive function; increases the activity of spermatozoa.
- acts as an antioxidant in cytostatic therapy; prevents cancer.
- facilitates regeneration of liver cells, stimulates its filtering activity in case of drug, alcohol, and chemical intoxications.
- increases visual acuity; is used in the treatment of glaucoma and cataracts; protects the retina from the harmful effects of sunlight.

COMPOSITION:

sorbitol, black cummin oil, beta-carotene, D-alpha tocopherol, tween-80 E433, ascorbic acid, capsule shell - Halal gelatin.

Recommendations for use:

Adults take

2 capsules in the morning with meals.

Duration of administration – 1 month.

If necessary, the course of administration can be repeated.

State registration certificate

No. RU.77.99.11.003.R.000998.04.22
of 04.04.2022

Technical Specifications

10.89.19-002-39826265-2020

Manufacturer:

Inlipor LLC, 6, Mira str., office 305,
Almetyevsk, Republic of Tatarstan, 423457.

Manufacturing site:

36a, Sergey Titov str., bldg. 2, Naberezhnye
Chelny, Republic of Tatarstan, 423803

Dietary Supplement

**LIPOVITAM
BLACK CUMIN**

**Pro-liposomal antioxidant
additional source of beta-carotene,
vitamin E, and Omega-3,6,9**

Recently, liposomal vitamins have been recognized as the best supplements for delivering vitamins to the body.

LIPOSOME IS THE BASIS FOR EXCELLENT ABSORPTION OF ALL USEFUL SUBSTANCES BY THE BODY.

Liposome

It is a hollow spherical particle, into which an active substance is incorporated. The liposome shell consists of phospholipids, which are also part of the membranes of human cells.

Phospholipids

Building material of body cells. They replace damaged areas of the cell membrane, protecting them from toxins and the action of free radicals.

Mechanism of action of liposomal vitamins

The active substance is incorporated into a liposomal shell. In the vicinity of the cell, the liposome fuses with the cell membrane and releases the active substance. The active substance enters the cell and is absorbed by the body in the maximum available concentration.

Being an active delivery form, the liposome makes vitamins bioavailable. This means better transportation and guarantees that the cell will absorb all essential and vital substances. Fundamentally, Liposomal Encapsulation Technology (LET) consists of special molecules called phospholipids. Liposomes can be loaded with therapeutic agents and nutrients. The liposome membrane will retain the nutrient and will not release it until it reaches the bloodstream.

96%
absorption
of vitamins

In the laboratory of Inlipor, it has been studied and found that the most optimal way to ensure the incorporation of the maximum amount of the substance into liposomes is the method of obtaining dry **pro-liposomal formulations** (100% incorporation of the active substance). The high degree of incorporation of substances into **liposomes** makes it possible to ensure high bioavailability of our products (**absorption up to 96%**).

Bioactive substances	Content in 2 capsules, NLT, (mg)	Recommended Daily Intake Adequate Intake (%)
Beta-carotene	10 mg	200%
Vitamin E	10 mg	100%
/ Black cumin oil	30 mg	—

Inlipor presents the pro-liposomal

DIETARY SUPPLEMENT LIPOVITAM BLACK CUMIN, WHICH IS A SOURCE OF:

- Omega 3, Omega 6 (58 % share) and Omega 9 (24 % share) fatty acids;
- phospholipids;
- amino acids;
- carotenoids;
- vitamins of groups A, B, C, D, E and K;
- minerals (potassium, sodium, phosphorus, iron, selenium, zinc);
- phytosterols;
- tannins.

Black cumin oil is distinguished by the balanced quantitative content of fatty acids:

myristic	0,1
palmitic	13,0
palmetoleic	0,03
heptodecanoic	0,05
heptodecanoic	0,02
steraric	3,00
oleic	26,7
lenoleic	56,0
linolenic	0,1
arachidic	0,1
eicosenoic	0,1
eicosadienoic	1,0

PRIMARY AREAS OF USE:

- ✓ Immunology
- ♥ Cardiology
- 👤 Gastroenterology
